Subject: Application — Senior Software Engineer

Hello,

I'm applying for the Senior Software Engineer position and wanted to briefly introduce myself.

I'm a software engineer with extensive senior-level, expert experience building and evolving production systems, primarily in C#/.NET environments. My background includes hands-on development, architectural decision-making, and working in regulated and enterprise settings. I'm currently focused on C#, .NET, WPF, async/parallel programming, REST APIs, and SQL Server.

I've attached my resume for your review and would welcome the opportunity to discuss whether my experience aligns with your needs.

Thank you for your time,

Michael
